Hyderabad, Telangana | +91 7799607163 | radhikabaigaru1918@gmail.com | <https://linkedin.com/in/baigaru-radhika> | <https://github.com/iradhika787>

CAREER OBJECTIVE

Final-year B.Tech CSE (AI & ML) student with strong programming and problem-solving skills and hands-on experience in software and AI-based projects. Seeking an entry-level software engineering opportunity to apply my technical knowledge, contribute to practical solutions, and grow professionally by learning new technologies.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Core CS Concepts: Object-Oriented Programming, Data Structures & Algorithms, DBMS

AI/ML: Machine Learning, Deep Learning, 3D CNNs, NLP, Computer Vision, Speech Recognition

Frameworks & Libraries: PyTorch, Scikit-learn, OpenCV, Flask, Streamlit

Databases & Tools: SQLite, Git, GitHub, VS Code

PROJECTS

Agentic AI-Based Python 2 to Python 3 Code Migration Framework

Python, Ollama (LLM), AST, Streamlit | [GitHub](#)

- Developed an agentic AI framework for migrating legacy Python 2 code to Python 3, using static analysis to detect compatibility issues and rule-based transformations to automate code conversion.
- Implemented an Analyze → Migrate → Verify → Retry pipeline that validates migrated code through syntax, compilation, execution, and optional test-suite checks, with Ollama-based LLM correction for unresolved issues; also built CLI and Streamlit interfaces for file/folder migration, code diffs, reports, and verification logs.

Based Violence Detection System for Intelligent Surveillance

Python, PyTorch, YOLOv8, OpenCV, SQLite | [GitHub](#)

- Designed and benchmarked three 3D CNN architectures (R3D-18, MC3-18, R(2+1)D-18) on the RWF-2000 dataset; MC3-18 achieved 81% recall and was selected for edge deployment.
- Integrated YOLOv8 person detection, temporal smoothing, and optical-flow analysis to reduce false positives, with SQLite-based alert logging and an optimised PyTorch inference pipeline.

Sentiment Analysis of Product Reviews

Python, NLP, Scikit-learn, Streamlit | [GitHub](#)

- Developed an NLP-based sentiment classification system using TF-IDF and Logistic Regression with an interactive Streamlit interface.
- Built the complete preprocessing, feature extraction, prediction, and deployment pipeline for product review classification.

Medibot – Voice-Enabled Conversational AI (Research-Published)

Python, NLP, Speech Recognition, ML | [GitHub](#)

- Developed a voice-enabled AI healthcare chatbot supporting symptom analysis, speech recognition, text-to-speech, and multilingual interaction.
- Published the project as a research paper in the International Journal of Science and Technology (May 2025), presenting the chatbot architecture and NLP pipeline.

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML) — Expected 2027

Sreyas Institute of Engineering and Technology, Hyderabad | CGPA: 8.64/10.0 | 15 years full-time education

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science — NPTEL Elite (Mar 2026)
- Programming in Java — NPTEL Elite (Apr 2025)
- Artificial Intelligence Fundamentals — IBM SkillsBuild (Dec 2025)
- Research Publication: Medibot — International Journal of Science and Technology (May 2025)
- Google Student Ambassador — Google Gemini (Dec 2025)
- TechSparks Nova — Certificate of Participation — TKR College of Engineering & Technology | Mar 2026
